Mohamed Jaseeth Mohamed Jaleel

Full-Stack Software Developer · Doha, Qatar
+974 3129 2637 | jaseeth2031@gmail.com | linkedin.com/in/jaseeth

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 3+ years of experience developing responsive websites, enterprise web applications, CMS-driven solutions, and eCommerce systems. Skilled in ASP.NET Core, C#, JavaScript, React, REST APIs, Entity Framework, and SQL Server, with hands-on experience in frontend and backend development, database integration, performance optimization, and n8n workflow automation. Experienced in delivering production websites, business applications, and interactive solutions, including the Alhazm Indoor Wayfinding system.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, jQuery, Bootstrap, Tailwind CSS, Responsive Design
Backend: ASP.NET Core, C#, REST APIs, Entity Framework
Databases: MS SQL Server, MySQL
CMS / eCommerce: Cofoundry(Headless loosely coupled CMS), Piranha CMS, NopCommerce, Shopify, WordPress
Mobile Development: Flutter, Dart
Automation & Tools: n8n, Git, GitHub, Azure DevOps, Visual Studio, VS Code
UI/UX & Design: Figma, SVG Animation, Photoshop, Illustrator
Currently Learning: TypeScript, xUnit, Playwright, CI/CD

WORK EXPERIENCE

Frontend Developer | Full-Stack Development Responsibilities

Al Emadi Enterprises - Alhazm *Dec 2023 - Present*

- Developed and maintained enterprise websites using ASP.NET Core, C#, JavaScript, HTML5, CSS3, Bootstrap, and SQL Server, delivering responsive frontend interfaces, backend functionality, REST APIs, and CMS-driven content management.
- Developed and enhanced the Al Emadi Property website using ASP.NET Core and Cofoundry CMS, implementing bilingual English/Arabic interfaces, dynamic property listings, advanced search and filters, property detail pages, and CMS integrations.
- Designed and integrated SQL Server database structures and Entity Framework-based data operations, supporting property information, customer enquiries, contact submissions, and backend data management.
- Optimized website performance and technical SEO through Cloudinary image delivery, WebP optimization, responsive layouts, metadata improvements, and frontend performance enhancements.
- Developed an n8n-based website monitoring automation system integrating ASP.NET Core REST APIs, content synchronization, HTTP health checks, image validation, Cloudinary compliance checks, and automated health-report generation.
- Implemented backend integrations, contact and enquiry forms, email functionality, security improvements, and deployment-related configurations for IIS-hosted ASP.NET Core applications.
- Collaborated on and maintained multiple business websites, eCommerce systems, CMS solutions, and mobile application interfaces, supporting development, testing, troubleshooting, and ongoing improvements.

Junior Web Developer - Marazin Pvt. Ltd. *2022 - 2023*

- Built and modified website layouts using HTML5, CSS3, and JavaScript, delivering 5+ client sites with clean, cross-browser compatible code.
- Improved visual consistency and UX quality across existing client sites by refactoring CSS and implementing reusable component patterns.
- Collaborated on UI design tasks using Figma and Photoshop, bridging the gap between design handoffs and coded implementation.

SELECTED PROJECTS

Completed Projects

Al Emadi Property Website — Full-Stack Web Development

Technologies: ASP.NET Core, C#, Cofoundry CMS, JavaScript, Bootstrap, Entity Framework, MS SQL Server, REST APIs, Cloudinary, IIS, n8n.

Developed and enhanced a bilingual real estate website with dynamic property listings, property search and filtering, detailed property pages, and CMS-driven content management. Implemented frontend interfaces, backend features, SQL Server integrations, enquiry forms, and REST APIs. Improved website performance, SEO, and image delivery through Cloudinary optimization.

Additionally, developed an n8n-based website monitoring solution to synchronize published content, detect HTTP errors, validate metadata and images, measure response times, and prepare automated website health reports.

Alhazm Indoor Wayfinding · *SVG · Cofoundry CMS · JavaScript · HTML5 · CSS3*

Designed and built an interactive indoor navigation system for Alhazm Mall from scratch. Used SVG path rendering and JavaScript event handling to let shoppers visually navigate 30+ stores from a touch-enabled interface. Sole frontend developer on the project - from concept to live deployment.

Alhazm Website · *ASP.NET Core · Cofoundry CMS · Bootstrap · MS SQL*

Delivered ongoing frontend and backend development including responsive UI improvements, CMS component development, and API-driven functional updates. Improved mobile performance and reduced reported layout issues across key pages.

Teeb Alhazm Website · *HTML5 · CSS3 · JavaScript · ASP.NET Core · Cofoundry CMS*

Contributed front-end UI redesign and backend feature support, improving page structure and visual consistency. Coordinated with design team to translate Figma mockups into production-ready templates.

EliteSuper Cars Website · *ASP.NET Core · JavaScript · Bootstrap · Cofoundry CMS*

Built custom UI components and backend-connected features for a luxury car dealership platform, including a dynamic vehicle listing interface with filter and search functionality.

Topperformance Website & Mobile App · *ASP.NET Core · Flutter · Dart*

Developed website frontend and supported mobile app interface screens, ensuring design consistency between web and app platforms.

Alhazm Mobile App · *Flutter · Dart · REST APIs*

Contributed reusable UI components and backend integration tasks for the Alhazm Mall app, working within a multi-developer team to deliver key app screens on schedule.

EDUCATION

BSc (Hons) Software Engineering - Universidad Santander Panamá *2025 - 2026*

Relevant modules: Web Technologies, Software Architecture, Database Systems, Mobile Application Development.

HND - Computer Software Engineering - ESOFT Metro Campus, Sri Lanka *2022 - 2023*

Focused on full-stack web development, UI/UX design principles, and software engineering practices.

CERTIFICATIONS & ACHIEVEMENTS

- Good Work Certificate - Awarded by the CEO of Al Emadi Enterprises for outstanding contribution to the Alhazm Indoor Wayfinding project, recognised as a technically innovative solution delivered independently.
- Hackathon Participant - Competed in the ESOFT Metro Campus coding competition, building a functional web application under time-constrained conditions using HTML, CSS, and JavaScript.
- Life Beyond HND - Completed outbound workshop on digital entrepreneurship and product thinking.
- Currently pursuing: Meta Frontend Developer Certificate (Coursera) and Microsoft Azure Fundamentals (AZ-900).
